## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 31 and 37, drawn to methods for detecting HIV-3 utilizing a DNA comprising the nucleotide sequence of SEQ ID NO:1, classified in class 435, subclass 6.
- II. Claims 31 and 38, drawn to methods for detecting HIV-3 utilizing a DNA comprising the nucleotide sequence of SEQ ID NO:2, classified in class 435, subclass 6.
- III. Claims 31 and 39, drawn to methods for detecting HIV-3 utilizing a DNA comprising the nucleotide sequence coding protein p12 of the HIV-3 retrovirus, classified in class 435, subclass 6.
- IV. Claims 31 and 39, drawn to methods for detecting HIV-3 utilizing a DNA comprising the nucleotide sequence coding protein p16 of the HIV-3 retrovirus, classified in class 435, subclass 6.
- V. Claims 31 and 39, drawn to methods for detecting HIV-3 utilizing a DNA comprising the nucleotide sequence coding protein p25 of the HIV-3 retrovirus, classified in class 435, subclass 6.
- VI. Claims 31 and 40, drawn to methods for detecting HIV-3 utilizing a DNA comprising the nucleotide sequence coding protein gp41 of the HIV-3 retrovirus, classified in class 435, subclass 6.

Art Unit: 1645

VI. Claims 31 and 40, drawn to methods for detecting HIV-3 utilizing a DNA comprising the nucleotide sequence coding protein gp120 of the HIV-3 retrovirus, classified in class 435, subclass 6.

It should be noted that claim 31 is listed with multiple groups and will be examined to the extent it reads on the elected Invention.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-VII are each separate and distinct as they are drawn to differing methods with differing steps and differing goals and **utilizing differing reagents**.

Because these inventions are distinct for the reasons given above and the search required for the various groups would not be coextensive in scope, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Art Unit: 1645

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and a product claim is subsequently found allowable, withdrawn process claims that depend from or otherwise include all the limitations of the allowable product claim will be rejoined in accordance with the provisions of MPEP § 821.04. **Process claims that depend from or otherwise include all the limitations of the patentable product** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103, and 112. Until an elected product claim is found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowed product claim will not be rejoined. See "Guidance on Treatment of Product and Process Claims in light of *In re Ochiai*, *In re Brouwer* and 35 U.S.C. § 103(b)," 1184 O.G. 86 (March 26, 1996). Additionally, in order to retain the right to rejoinder in accordance with the above policy, Applicant is advised that the

Art Unit: 1645

process claims should be amended during prosecution either to maintain dependency on the product claims or to otherwise include the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.**

Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues.

See MPEP § 804.01.
